## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 8\_Q5

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

In a file management system, users are required to provide a valid file name when creating new files. The system enforces specific rules for file names to maintain consistency and avoid potential issues. Your task is to implement a Java program named FileNameValidator that takes user input for a file name and validates it according to the specified rules.

Rules for Valid File Name:

The file name must consist of alphanumeric characters (letters and digits) only. The file name must have a minimum length of 3 characters.

Implement a custom exception, FileNameValidator, to handle cases where the entered filename does not meet the specified criteria.

***Input Format***

The input consists of a string S, representing the desired filename.

### **Output Format**

The output is displayed in the following format:

If the entered file name meets the specified criteria, the program outputs

"Valid file name"

If the entered file name does not meet the criteria and triggers the `InvalidFileNameException`, the program outputs

"Error: Invalid file name. It must be alphanumeric and have a minimum length of 3 characters."

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: myfile123

Output: Valid file name

### **Answer**

```
// You are using Java
import java.util.*;
class InvalidFileNameException extends Exception{
    InvalidFileNameException(String s){
        super(s);
    }
}
class file{
    public static void main(String[] args){
        Scanner sc = new Scanner(System.in);
        try{
            String name = sc.nextLine();

            if(( name.matches("[a-zA-Z0-9]+")) && name.length()>=3)
                System.out.println("Valid file name");
            else
                throw new InvalidFileNameException("Error: Invalid file name. It must be
```

alphanumeric and have a minimum length of 3 characters.");

```
    }  
    catch(Exception e){  
        System.out.println(e.getMessage());  
    }  
}  
}
```

**Status :** Correct

**Marks :** 10/10
